

# THE MATH

## DAYLIGHT TREMOR

Alan G © 2008

### CRYING ALTITUDE

*Verse One*

And I just long for an atmosphere  
With whom I can breath  
With whom I'll hear

*Verse Two*

And I just long to be near an atmosphere  
Whom I can hear  
In whom I'm clear

*Outro*

And I stay cold  
And I stay cold  
And I stay cold  
And I stay cold

### SILHOUETTES

*Verse One*

You look down around here  
The air's so clear a thousand miles up here  
You look down all around here  
The hum in your ear is so far from here

*Verse Two*

You look down around here  
Take a window seat to admire the view  
You look down all around here  
They call your name but it's never the same

*Chorus*

Shine like the stars  
And glow in the dark  
Shine like the stars  
As this room grows dark

Shine like the stars  
And glow in the dark  
Shine like the stars  
As this room grows dark

*Verse Three*

You look down as your ground disappears  
Everything that you have is near  
You look down as the waves appear  
The screams die down; you're the only one around

*Chorus*

Shine like the stars  
And glow in the dark  
Shine like the stars  
As this room grows dark

Shine like the stars  
And glow in the dark  
Shine like the stars  
As this room grows dark

*Outro*

Glow, in the dark  
Glow, in the dark

**WATCHING SATELLITES**

*Verse One*

The birds are refusing to sing  
While we play hillside  
And a brilliant attack  
Smashes the scenery

*Verse Two*

The cold light of day  
Falls with transmissions  
Just watching satellites  
For a logic overhead

*Chorus*

Light of the world is broken  
And I cannot see at all  
Light of the world is broken  
But he died so I'd survive

*Outro*

You look around,  
Around

**TEAR**

*Verse One*

I'll tear my wings out to try and find you there  
I'll tear my wings out to find you  
I'll tear my wings out to try and find you there  
I'll tear my wings out to find you

*Verse Two*

Holding this hope is like holding a fire  
I just don't want to let it die  
But holding this hope could just be a lie  
I guess we'll see at sunrise

*Verse Three*

I'd swim divided just to hold you there  
I'd swim divided to hold you

*Verse Four*

I'll tear my wings out to try and find you there  
I'll tear my wings out to find you  
I'll tear my wings out to try and find you there  
I'll tear my wings out to find you  
To find you

**HOLDING HEAVEN**

*Verse One*

Your running around, your little nation  
Counter clockwise, to creation  
Your walls fall down, not even a sound  
It's cold outside, but colder within you

*Verse Two*

Running around, your little nation  
Counter clockwise, to creation  
Computers hum, with every move you make  
Misery has, another name

*Chorus*

They're not sure, but you're sure of me  
Holding Heaven, I can run free  
I'm not sure, but you're sure of me  
Holding Heaven, upon your Tree

*Verse Three*

Shine on brightly, treading so lightly  
But you're on your wall watching other crawl, beneath you  
And you breathe violence, in a world of silence  
They've tied up your wings, or maybe it's you

*Verse Four*

Running around, your little nation  
Counter clockwise, to creation  
Computers hum, with every move you make  
Not another mistake

*Outro*

They're not sure, but you're sure of me  
Holding Heaven, I can run free

**THE AUTHOR**

*Verse One*

I try, try to walk  
Try, try to talk  
But the only thing I see  
Is bleeding from a tree

*Verse Two*

There, oh there He lay  
With a crown, not making a sound  
And all, all around  
Creation's bearing down

*Chorus*

And I know its ok  
And I know its ok  
And I know its ok

*Verse Three*

I try, try to walk  
Try, try to talk  
But the only thing I see  
Is bleeding from a tree

*Chorus*

And I know its ok  
And I know its ok  
And I know its ok

**FALLOUT OF FASHION**

*Verse One*

Open my eyes open my  
Open my eyes to see you're clearly  
Open my eyes to see  
Open my eyes to see you clearly  
Open my eyes to see

*Verse Two*

You're brighter than all the other saviors  
You're brighter than all of them  
You're truer than all the other creators  
You're truer than all of them

*Verse Three*

Open my eyes to see you're clearly  
Open my eyes to see  
Open my eyes to see you clearly  
Open my eyes to see

**EVERYTHING IS NICER IN THE RAIN**

*Verse One*

You wash away  
To show a brighter world  
We're scratching daylight  
Through open windows  
For a while  
For a while

*Verse Two*

And every, everything is nicer  
In the rain  
When I'm with you  
Shinning with you  
With you  
With you  
With you  
With you

*Verse Three*  
And everything is nicer  
When I'm with you  
With you

### **SMILE UNDER THE LIGHT**

*Verse One*  
You walk out, you save the day

*Verse Two*  
The stars He flung into space  
Shine so brightly for the human race

*Chorus*  
Smile under the light  
Smile under the light

*Verse Three*  
Darkened understandings, advanced warnings  
Emerge now, sleeper  
And let Christ's light shine on you

*Chorus*  
Smile under the light  
Smile under the light

### **STRANGERS ON EARTH**

*Verse One*  
The fire has gone from my eyes  
But that's no surprise  
Anxious and uptight  
Up all night

*Verse Two*  
When the world's happiness fades  
We'll be left drained  
But we're strangers on earth  
This is not our turf

*Verse Three*  
The fire has gone from my eyes  
But that's no surprise  
Anxious and uptight  
Up all night

### **THE MATH OF THINGS TO COME**

*Verse One*  
They see you only for  
I've seen you, but only before  
To lie with you  
To smile with you

*Verse Two*

And I miss your summer ways  
And I miss those glorious days  
But I feel no pain  
It's all the same

*Chorus*

All around, around here  
The math to come  
All around, around here  
The math to come

*Verse Three*

I miss your song  
That you sing  
I miss that song  
That you'd, that you'd sing

*Chorus*

All around, around here  
The math to come  
All around, around here  
The math to come

All around, around here  
The math to come  
All around, around here  
The math to come
